

Boost Energy, Naturally

MGCPQQ® is the perfect addition to a healthy regimen

Work it Out.

Exercise has many benefits:

- Increases energy, leading to more mitochondria and an increased metabolism—critical for anti-aging
- Improves cognitive function, including concentration
- Boosts cardiovascular health, meaning greater endurance throughout the day

Catch Some Sun.

Vitamin D helps stimulate:

- Muscle efficiency
- Energy levels
- Immune system health

Hydrate.

Mild dehydration can cause a slew of issues, impairing:

- Cognitive performance
- Energy levels
- Mood
- Memory

A Healthier Life

Active consumers are looking for natural energy sources

Healthy lifestyles are becoming the norm, resulting in:

- High demand for natural products
- Consumer willingness to pay premium price for natural and organic items
- Younger consumers seeking out supplements

Understanding Cells:

- Mitochondria are vital, creating energy in cells
- As people age, the quality and number of mitochondria deteriorates and decreases

MGCPQQ®—Most Tested. Most Trusted.

Studies show MGCPQQ® may promote:

- Nerve growth in the brain
- Creation of mitochondria
- Activation of energy-building cell growth

Safe for athletes to use:

- The only supplement of its kind registered on the European's List of Novel Foods
- Informed Ingredient Certification
